Lesson 1

- Basic print statements and arithmetic

  Importing libraries

  String concatenation

  Arithmetic symbols

  Rounding a float

Code file name

basic_print_and_arithmetic.py

- Variable types

  string   complex   range
  int   list   dictionary
  float   tuple   set
                     boolean

Printing variables within string with print(f'{var}')
join function for strings
Printing the type of a variable
Immutability of tuples
Logic with booleans
